

TIMBER CARE

Restoring & New Timber Polish

Clear / Dark Gilly Stephenson's

Typical Characteristics

Appearance semi-solid wax
Solubility in Water negligible
Specific Gravity 0.8

MSDS available

STEP 2 - PREPARE

Raw & Unsealed Timber, Stripped Furniture

DESCRIPTION

Gilly Stephenson's Restoring & New Timber Polish is designed as a starter polish for new work or furniture that has been stripped back.

TYPICAL USES

- Restores moisture to furniture that has become dry or faded
- For raw and unsealed wood
- Effective on leather - can be used on both dark or brown leather
- Not suitable for constant use on French polished furniture or other similarly sealed surfaces as it may become too 'greasy'

FEATURES

- Brings out the natural grain of wood, feeds the timber and provides a good initial sheen
- Available in clear and dark
- Contains no harmful silicone or hydrocarbon solvents

APPLICATION

1. Apply 1-3 coats of **Restoring & New Timber Polish** to prepared surface and buff with a soft cloth.
2. For a higher sheen and harder finish apply a coat of **Cabinet Maker's Wax** preferably using [0000] steel wool. Buff with a soft cloth. The number of applications will depend on the finish required.

Code	Colour	Pack Size	Unit Barcode	Carton Barcode	Ctn/Plt
