

OXIDES & POWDERS

Diggers Hardwall Plaster

DESCRIPTION

Diggers Hardwall Plaster is a fine, white, odourless powder used to bridge gaps and imperfections in hardwall plaster. The formulation is simple and ready-to-use, just add water. Lime, cement and other additives are not required to retard the setting time.

Typical Characteristics

Appearance off-white, odourless powder
Specific Gravity..... 2.5–2.6
Soluble in Water..... yes

MSDS available

TYPICAL USES

- Plaster finishes
- All types of masonry
- Hard veneer finish for timber

FEATURES

- Sets in approximately 55 minutes
- Fine off-white, odourless powder
- Coverage approximately ¾ m² per kg
- Simple and easy-to-use

APPLICATION

1. Add 1 part **Diggers Hardwall Plaster** to 0.5 parts water and mix to a creamy consistency.
2. If the mix is too wet simply add more **Diggers Hardwall Plaster**. If too dry, add more water and mix again.
3. Wet the surface to be plastered with water (if surface is very porous, mix 1 part **Diggers Griprete** to 8 parts of water and use this mixture instead of water).
4. While the surface is still wet apply the **Diggers Hardwall Plaster** mix using a trowel - without leaving trowel marks.
5. Leave until firm (approximately 45 minutes from the time of making the mix) - maintaining checks regularly.

HINT: Wet trowel before trowelling to achieve a smooth and shiny finish.

HINT: Remove all plaster from door frames, power points, floors, tools etc. with water before it sets hard.

SAFETY

Wear suitable protective clothing, gloves and eye / face protection when using this product.
