

## SOLVENTS / PENETRANTS

# Ethyl Acetate

### DESCRIPTION

A fast evaporating, characteristic fruity smelling solvent used for a variety of applications. **Ethyl Acetate** is a moderately polar solvent that has the advantage of being volatile, relatively non-toxic and non-hygroscopic.

### FEATURES

Fast evaporating solvent.

Fruity smell.

Activator or hardener for paint applications.

Can dissolve up to 3% water and has solubility of 8% in water at room temperature.

**Ethyl Acetate** is used as a solvent in varnishes, lacquers, enamels and dry cleaning. It removes stains, fats, nitrocellulose, nail polish, nail polish remover and base coats in manicuring products.

**Ethyl Acetate** can also be used in pharmaceutical, perfumery and food applications or in solvent based flexographic printing inks.

### PACKAGING

**Ethyl Acetate** is available in drums.

### SAFETY

Please consult the MSDS on **Ethyl Acetate** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

### Typical Characteristics

Appearance .....	colourless liquid
Odour.....	mild, fruit-like
Melting Point.....	-83°C
Boiling Point.....	77°C
Vapour Density .....	3.04
Vapour Pressure.....	100 mm Hg at 27°C
Specific Gravity.....	0.9
Flash Point.....	-4°C
