

SOLVENTS / PENETRANTS – LOW ODOUR

# Recosol M

## DESCRIPTION

A high flash point, paraffinic hydrocarbon solvent with a very low odour that performs well as a diluent in chemical formulations where low odour products are preferred. **Recosol M** is also suitable as a high quality lamp oil as it burns cleanly without generating smoke or unpleasant odours. **Recosol M** is the functional equivalent to Isopar M.

## FEATURES

A very low odour solvent that is a convenient alternative to Mineral Turpentine, White Spirits or Kerosene.

A high quality, smokeless lamp oil.

A high flash point solvent that is not classified as dangerous goods for transport or storage.

Low aromatic content ensures lower potential for attack of plastics and rubbers.

Can be used as a rolling oil.

**Versatility** – **Recosol M** can be included in many formulations where a non-regulated solvent is required and will combine well with other organic compounds.

**Solvency** – **Recosol M** has a good solvency of greases, oils and waxes as well as selective polymeric surface coatings. It does not have the inherent capability to swell rubber or plastic, making it an appropriate electrical cleaner that can be stored in containers with low tolerance seals.

## PACKAGING

**Recosol M** is available in drums.

## SAFETY

Please consult the MSDS on **Recosol M** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

### Typical Characteristics

Specific Gravity.....	~0.75
Flash Point.....	~75°C
Boiling Range .....	190–230°C
Aromatic Content.....	100ppm
