

SURFACTANTS & DETERGENT ADDITIVES

SLES 28% (Sodium Lauryl Ether Sulphate)

DESCRIPTION

Readily pourable, palm-derived, high foaming, anionic surfactant used in the chemical formulating and detergent manufacturing industries. It is a higher foaming variation of Sodium Lauryl Sulfate (SLS).

FEATURES

Free flowing liquid makes it easier to pour.

Used in wetting agent formulations, liquid detergents, cleaners, shampoos and laundry detergents.

SLES 28% dissolves readily in hard and soft water and provides a consistent foam character.

PACKAGING

SLES 28% is available in IBCs (1000kg bulk containers) and drums.

SAFETY

Please consult the MSDS on **SLES 28%** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

Typical Characteristics

Appearance	pale yellow clear liquid
pH (1% solution)	6.5–8.5
% Active	28%
Specific Gravity	1.05
Molar Quantity	2 mole
Boiling Point	100°C
