

SURFACTANTS & DETERGENT ADDITIVES

Soda Ash Light

DESCRIPTION

Soda Ash Light (commonly known as sodium carbonate) is a white powder designed for use in powdered detergents and cleaners, chemical processes, pool pH adjustment, industrial cleaning and textile preparation.

FEATURES

Used in water treatment formulations as a water softener.

Used as a reagent in glass manufacturing.

Used as a pre-treatment of textile fibres for dyeing or any chemical process requiring alkaline pH conditions.

Dissolves readily in hard and soft water.

Non-regulated.

Soda Ash Light is a stable powder used in alkaline powder blends where a lower bulk density is required.

PACKAGING

Soda Ash Light is available in 25kg bags.

SAFETY

Please consult the MSDS on **Soda Ash Light** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

Typical Characteristics

Appearance	granular white powder
Solubility In Water @ 20°C	22 g/ 100 mm
pH (1% solution)	8.4
Specific Gravity	2.53
Melting Point.....	851°C
