

Special Methylated Spirits

DESCRIPTION

Special Methylated Spirits is a non-potable ethanol (denatured with Methanol) suitable for applications where the higher odour or presence of other denaturants makes conventional Methylated Spirits unsuitable. **Special Methylated Spirits** requires an Australian Taxation Office (ATO) license to transact.

FEATURES

Clear, colourless liquid miscible in water and many other solvents.

Used in industrial cleaning formulations and laboratory reagents.

Versatility – **Special Methylated Spirits** is often a suitable alternative to isopropanol where solubility is not critical or can be assisted by other formula components.

PACKAGING

Special Methylated Spirits is available in tanker compartments, IBCs (1000 litre bulk containers), drums, 20 litre containers and 12 x 1 litre cartons.

SAFETY

Please consult the MSDS on **Special Methylated Spirits** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

Typical Characteristics

Specific Gravity.....	0.81
Flash Point.....	12.7°C
Boiling Point.....	78°C
