---

**SECTION 5 FIRE FIGHTING MEASURES**

---

**Suitable extinguishing equipment**

Use dry chemicals, carbon dioxide, water spray or foam.

**Specific hazards arising from the chemical**

Carbon dioxide, carbon monoxide and carbon particulates.

**Special protective equipment and precautions for fire fighters**

Wear full protective clothing and self-contained breathing apparatus.

---

**SECTION 6 ACCIDENTAL RELEASE MEASURES**

---

**Personal precautions, protective equipment and emergency procedures**

Spilled material can cause a slipping hazard. Clean up immediately. Wear protective equipment to prevent skin and eye contact and breathing in vapours. Work upwind or increase ventilation. Shut off leaks, if possible without personal risks. Isolate hazard area and deny entry to unnecessary or unprotected personnel. Avoid generating dust. Wear appropriate respiratory protective equipment when responding to large clean ups.

**Environmental precautions**

Contain and prevent runoff into waterways and drains.

**Methods and materials for containment and cleaning up**

Material should be recovered (swept, shovelled or vacuumed) and placed in a suitable container for recycle or disposal. Dispose of in accordance with regional regulations.

---

**SECTION 7 HANDLING AND STORAGE**

---

**Precautions for safe handling**

Avoid contact with eyes, skin and clothing. Do not ingest. Avoid generating and breathing dust. Handle open containers in well ventilated area. Do not empty into drains. Wash thoroughly after handling. Do not eat, drink or smoke in contaminated areas. Before eating, drinking or smoking, remove contaminated clothing and wash hands.

**Conditions for safe storage, including any incompatibilities**

Avoid strong oxidising substances.

---

**SECTION 8 EXPOSURE CONTROLS AND PERSONAL PROTECTION**

---

**Exposure control measures**

From National Occupational Health & Safety Commission (NOHSC) Worksafe Australia -  
 No exposure standard available. However, the following particulate limits are stated as a guideline: Total dust (8hr) 15mg/m<sup>3</sup>, respirable fraction (8hr) 5mg/m<sup>3</sup>.

**Biological monitoring**

No biological limit allocated.

**Engineering controls**

Ensure that adequate ventilation is provided. Avoid generating and inhaling mists and vapours. Keep containers closed when not in use.

**Individual protection measures**

Eye and face protection:	Wear safety goggles.
Skin protection:	Use solvent resistant gloves, nitrile for longer term protection or PVC and neoprene for incidental splashes.
Respiratory protection:	If work practices do not maintain adequate ventilation, use appropriate respiratory protection equipment. When using respirators, select an appropriate combination of mask and filter. Select a filter for organic gases and vapours (boiling point > 65°C). Respirators should comply with AS1716 or an equivalent approved by a state/territory authority.
Thermal hazards:	Not applicable.
