

ALCOHOLS

CSA 30/70

DESCRIPTION

Specialty fatty alcohol blend primarily used in the surfactant and chemical manufacturing industries.

FEATURES

A blend of predominantly cetyl and stearyl alcohol.

Solid flake at room temperature.

Emulsion stabiliser.

Viscosity improver for both aqueous and non-aqueous solutions.

Non-regulated for storage and transport.

Typically used in surfactant production and hair conditioners.

PACKAGING

CSA 30/70 is available in bulk and 20kg bags.

SAFETY

Please consult the MSDS on **CSA 30/70** before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

Typical Characteristics

Appearance	white waxy flake
Boiling Range.....	315-350°C
Solidification Range	50-54°C
Specific Gravity.....	0.81
