

SURFACTANTS & DETERGENT ADDITIVES

LABS Acid (Laurylbenzene Sulfonic Acid)

DESCRIPTION

Laurylbenzene Sulfonic Acid is a surfactant used in chemical formulations and detergent manufacturing industries.

FEATURES

Viscous amber brown coloured liquid.

Used in household detergents, liquid cleaners and laundry detergents.

Versatility – LABS is a very versatile product capable of being used in many detergent and cleaner formulations.

PACKAGING

LABS is available in IBCs (1000kg bulk containers) and 210kg drums.

SAFETY

Please consult the MSDS on LABS before use.

The information and recommendations contained herein are based on data believed to be correct at this time. However, no guarantee of any kind, expressed or implied is made with respect to the information contained herein.

Typical Characteristics

Appearance	thick amber brown fluid
Molecular Weight	326
Active	96%
Free Acid (Sulfuric)	<1.5%
Specific Gravity	1.05
